

Rewmar

**Fast, clean and easy
to use adhesive.**

- Solvent free
- Not water based
- Fast cure time
- Waterproof seal
between both surfaces

Designed for fixing:-

- Capping Strips
- Anti-slip Inserts
- Cove Formers
- Sit-on, Set-in or Flat Skirting

Suitable for:

- PVC, Aluminium, Metal or Wood

Coving

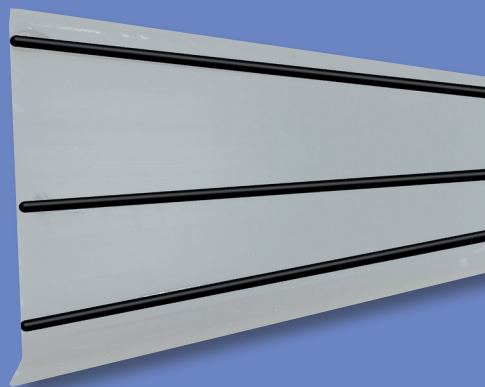

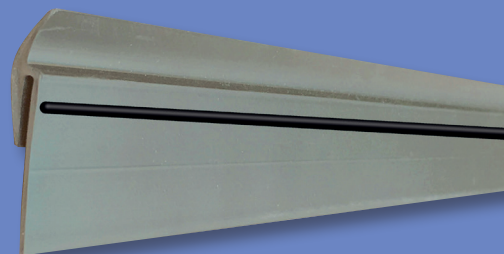

Coving can be fitted by applying one bead of adhesive to either the top or the bottom of the cove, depending on whether you stick it to the wall or the substrate.

Capping

Capping will usually only require one 3mm bead of adhesive which can be applied either to the capping itself or to the wall. The adhesive can be applied directly to the wall.

Skirting

Skirtings are especially suitable for fixing by Cap&Cove. Usually 3 beads of 3mm diameter adhesive will be sufficient to fix up to 100mm deep skirting in most materials including PVC, wood, aluminium (brushed or otherwise), metal or composites.

Part of the Rewmar family of adhesives
